

by Good Team Name

Game Theme

- Puzzle Game
- Centred around moving specific objects within a level by changing their properties
- Manipulation of object properties
 - Gravity
 - Size / Density (weight)
 - Burnable
 - Bounciness
 - Conductivity
 - Reflective
- Basic physics like drag / push

Design Aspects

- Main Hub (Doors to different puzzles)
- Focus on changing the properties of cubes to solve puzzles
- Puzzles to complete to find keys
- Find all the keys to open the door to the final room

Design References

- Room Style
 - Antichamber

- Room Design
 - Portal

- Hub Room Design
 - Crash Bandicoot 2

Progress So Far

- Level loading
- UI
- Sound
- Basic physics
- Basic collisions
- Lighting
- Post processing
- Camera system

Basic Level Example – not in engine

What's next/currently being done

- 3D sounds (again)
- Sound design
- Adding new levels
- Main menu
- More advanced collision/physics i.e., cubes on buttons and different object sizes
- Player/tool classes
- More multitool modes like conductivity and bounciness
- General polish like loading screens, cleaner visuals, update assets and models
